

Outcome Report for BIO 9 - Human Biology

Originator	Maria Magdalena Carrasco Reyes
Outcome Assessment Type	Course (SLO Aggregate) Assessment
Activation Date	28-Jul-15
Course	BIO 9 - Human Biology
Effective Terms	Summer 2015

Assessment & Analysis

Improvements made since the last assessment

60% of total number assessed meets SLO 1; the rest is developing SLO 1 90% of total number assessed meets SLO 6; the rest is developing SLO 6 Data indicate that a lower percentage of students were able to meet SLO 1, but the percentage of students that met SLO 6 stayed the same, compared to Spring 2015.

Summary of analysis/discussion

Data indicate that a lower percentage of students were able to meet SLO 1, but the percentage of students that met SLO 6 stayed the same, compared to Spring 2015. Due to the brevity of the Summer semester, I was not able to apply all the changes I previously suggested, but I will make an effort to do so next semester.

Next Steps

What future improvements, if applicable, do you plan to implement based on your assessment data, when are you planning to implement these changes, and how will you tell these are successful?

I will include other exercises similar to the ones used to evaluate SLO throughout the semester.

What are the resources you will be requesting?

The following resources will help to attain the SLOs: -a whiteboard in the classroom -i clickers for the students -a laptop or desktop available to be used in the classroom by the instructor

Share Your Highlights

Share your highlights: Tell us about positive outcomes that have come to you, your students, your department, or the college as a whole from this outcome assessment. We will share some of these highlights on our college website.
