Subject: ShakeAlert pilot with Regroup

Good morning,

The folks at U.S geological survey (USGS) have been working on an early warning system for earthquakes (http://www.ShakeAlert.org) and they are at a stage in their development where they have asked vendors who provide emergency notification to help TEST out the early alert system. The vendor we use for text messaging ReGroup has reached out to us to see if we (4CD) would be interested in participating in the testing of the text messaging portion of the system. Since this is a Pilot/test system it is NOT ready to be used for the general public but limited individuals in our district to receive test messages when USGS triggers their testing.

We do not have a date or time when they will trigger these test text messages but if you or selected individuals within the college would like to participate in this Testing please let me know and we can add you to the test group.
