### Longwood Scholarship

The first goal I've had since I was a little girl is to take care of my families and myself by making a lot of money in the future. So, I always asked my dad what kinds of jobs could make a lot of money, and not boring. My dad claimed, "All jobs always have their meaning, but no job gives you a good amount that you need, because you cannot end what you need easily. Whether you run your own business or you work for any company else, the revenue or income you make depends on the economic. We all want to have a good and stable job, and good living condition, but nothing stays forever. Our life is going to be affected significantly if the economic goes down which causes pricing fluctuation as well as our nation and the whole world." At that moment, I didn't get what he means. He's keeping saying that. Until I came to the United State, his words and all the things I've learned influence my perspective about what I should pursuit and what can bring me to the heaven of success, I feel curious how it affect intensely like that. That's why I choose business as my major to help my family business, become a successful businesswoman and contribute to the economy in Vietnam and to the U.S. as well.

In order to reach this dream, I set a goal for my own self: I have to get an education and educate myself such as continuing learning English skills and getting three AA/AS degrees at Contra Costa College, then transferring to a 4-year university and getting experience after I get a job.

Studying in here, I feel hungry for a better education, and I am caring and I like to help others. My desire to contribute to the community brought me to the Business club,

International student club, Adelante program and the AGS club. They gave me more opportunities such as volunteer section, meetings and some outdoors activities that help me gain valuable experience to interact and work closely with many faculty members and others. By volunteering some hour at school, I can give my time to community while at the same time I can earn memories and friendship that will last for the rest of my life. Also, I am currently a peer tutor at Contra Costa College. I am tutoring and assisting other students who need help for their assignment and their materials which relate to math and my business major. I feel like this would help me dramatically. I will not have a problem talking to people that already work in the field because I have learned that people are friendly and are willing to help others because assisting others is what this career entails.

Upon with great enthusiasm and perseverance that my dad inspired me, I have become the person I am today. Therefore, by sharing my activities and goal, I hope I can receive this scholarship, so I can buy more books and materials that I need for classes and/or study myself, support part of living standard and tuition.
